SKILLS

LANGUAGES

- C++
- JAVA
- HTML, CSS, JAVASCRIPT
- php

TECHNOLOGIES/LIBRARIES

- Data Structures
- Node.js
- React.js
- MYSQL

HOBBIES

- ✓ Music
- ✓ Travelling
- ✓ Volunteering

EXPERIENCE

ARROW EDUTECH | Trainee

July 2023 - September 2023

Developed a **Front-end web site** using **HTML, CSS & JS** to make mathematics more easy and fun for students and can help them to understand the concept better.

A2IT | Trainee

August 2022 - September 2022

Acquired proficiency in fundamental **data structures** and **algorithm** through the study of **C++**.

PROJECTS

MATH.FUN | ([GitHub Link](#))

September 2023 | Built with Frontend Languages.

Developed **MATH.FUN**, a versatile web application that serves as a comprehensive math utility. It offers a user-friendly **number calculator**, **series generator**, **calculates areas** of various shape parameters, and includes an interactive **quiz module**.

MYNTRA CLONE | ([GitHub Link](#))

July 2023 | Built with Frontend Languages.

Created a Myntra-inspired web application, specializing in **frontend development**. Designed and coded the user interface using **HTML, CSS, and JavaScript** for responsive and engaging web pages. Successfully replicated core features from the original platform.

SHORTEST PATH FINDER | ([GitHub Link](#))

April 2023 | Built with React.Js

Designed a **graph visualization tool** that employs the **Dijkstra algorithm** to determine the **shortest path** between two **vertices**.

VOLUNTEER EXPERIENCE

Organized a **Coding Club** in our college, that encourages **problem solving** among students in college.
